Two comments heading these quotations are apt: "It is difficult to pigeonhole the universal resonance that sounds throughout Coomaraswamy's writings"—Whitall N. Perry. "It is always best to be cautious when quoting these utterances emphasising their contextual origins".—S. Durai Raja Singam. None the less the following quotation from a speech, with Coomaraswamy speaking of himself, may give an idea of the man: "I think it may be fair to myself, and to others present, to say that I am in fact almost as much a Platonist and Medievalist as I am an Orientalist, and that in writing on cultural relations my work has always been directed towards an exposition of the common metaphysical tradition that underlines both cultures, European and Asiatic, and to showing that their differences, however great, are accidental rather than essential. . . ".

Readers may find it difficult to adjust to the differences of level of these quotations, evidently taken from profound metaphysical expositions, from public speeches, and from informal conversation, but those, who are fortunate enough to obtain a copy of this small book, will surely find there treasures from the mind of one of the most acute intelligences of recent years.
